Formula Windsurfing RACING

Formula Windsurfing Racing is 1 board, 3 sails and 3 fins. Large sails combined with short ultra lightweight "wide-style" boards allow planing in very low wind conditions. That same board is suitable to race in up to 35 knots of wind travelling at up to 70km/h!

The gear is at the cutting edge of aerodynamic and engineering technology. This is the racing class the World's best Professional Windsurfers choose to sail on. The current World Champion is Australian.
